

# **TECHNICAL DATA SHEET**

**Current Sensor** 

Phase current sensor NxxxE-xx

Non-conventional - instrument current transformer Earth sensitive sensor

# **Description**

The current sensor range of sensors unifies high cost efficiency with maximum accuracy in a combined testing system. This product is designed for use in conjunction with devices, which are compatible to the IEC standard. This current sensor is for Retrofit applications due to the possibility to split this transformer during installation.

#### **Features**

- No calibration on site is needed
- Class 3/1 acc. IEC61869-10
- · Cost efficient design
- Split core for easy installation
- Special design for different pole distances
- Accuracy over complete lifespan

### **Dimensions**

The earth sensitive current transformer is divisible and fit on cables up to 55mm diameter. The clamping system is done with screws so the fixation of the two half's of the transformer.

Legal status GmbH; Domicile in Rohrau
Companies register: Landesgericht Korneuburg
FN 506344z

VAT-no.: ATU74116002

### Installation

The current sensors are simple to install, the split core designs make it easy to install, where the main cable is already installed.

There are some important points that must be considered during the installation process:

- Always power down before installation
- Due to the design of this product, there is no danger of high voltages, if the sensor is not short circuited or connected to a measurement device
- Only for insulated cables or insulated areas on the T-cable connector, maximum voltage 720VAC<sub>R.M.S</sub>

Shield of the medium voltage cable MUST BE led through the current sensor (see graphic)

### Connection

The current sensor is directly connected to a measurement device.

Pay attention to the P1, P2 marking

## **Specification**

Applied Standards: IEC61869-10
Primary current: 60A, Ext. 200%\*

Secondary output:  $225\text{mV}^*$  Burden:  $>20\text{k}\Omega$  Rated short time thermal current: 25kA, 3s Isolation voltage:  $720\text{V}_{AC}/3\text{kV}/-$ 

Accuracy class: 3/1 according IEC61869-10

Protection class: max. 5P50
Operating temperature range: -25°C to +55°C
Storage temperature range: -40°C to +80°C
Frequency: 50 or 60Hz

Cable: 2pole, shielded, twisted pair, 2m or more acc. customer

definition, open ends (red-S1, black-S2)
